City and Station APIs

Broadcast real-time

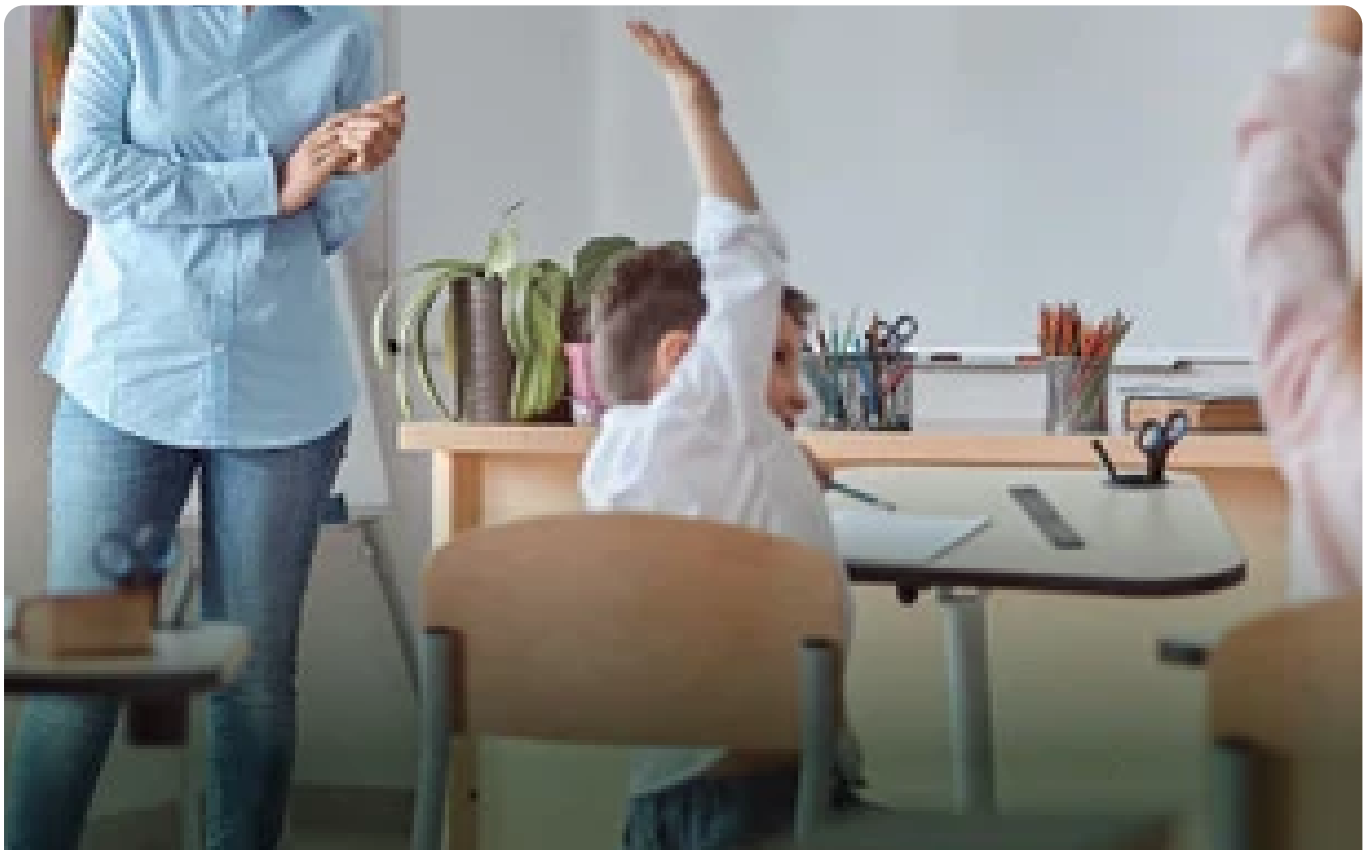

Monitor air quality and

ACCURATE LOCAL AIR QUALITY AND WEATHER DATA

AirVisual collects data from the largest network of ground-based sensors worldwide, providing the most accurate and reliable air quality information.

The only air quality data you can rely on. All data points are validated using artificial intelligence and machine learning, to ensure data your users can trust.

Our dedicated API support team is on hand to help you quickly and seamlessly integrate air quality data to your applications.

The IQAir API has been leveraged successfully in various real-world applications from automating air purifiers to building custom dashboards, integrating with smart home systems via platforms like Pipedream, powering environmental data visualizations,

enabling real-time air quality alerts in building management systems for localized air monitoring.

CONTACT US

Live data from low-cost sensors

Global satellite AQI data

Beta attenuation & other regulatory monitor data, PM10 and PM2.5

Real-time weather & climate data

Validates & calibrates data using environmental conditions

Improves data accuracy with machine learning

Estimates AQI in unmonitored areas

Modelizes forecasted data

Real-time hourly PM2.5 & CO_2 data

APIs for Building Management Systems

IQAirAirVisual Web Dashboard

3D global air quality data models

Monitor air quality and weather data in real time, including:

- **Location Data**: City names, station identifiers, and precise GPS coordinates
- **Air Quality Metrics**: AQI Index, PM2.5, PM10, SO2, CO, O3, and NO2 levels
- **Weather Updates**: Humidity, atmospheric pressure, wind speed and direction, and a 3-day forecast
