ADD TO CART

Monitors up to 8 environmental parameters: AQI, smoke (PM1), fine dust (PM2.5), coarse dust (PM10), temperature, relative humidity, barometric pressure and CO2 (optional).

Rugged outdoor design resists weather and insects, installs easily with included UV-resistant cable and accessories, and requires no recalibration.

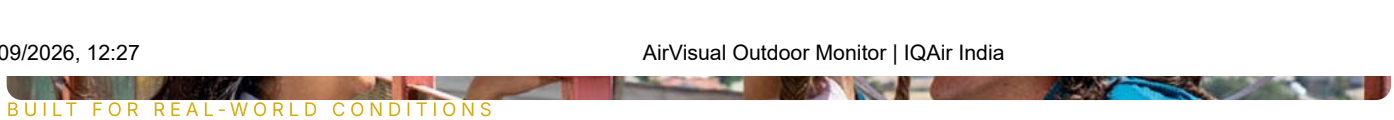

User-Friendly, Weatherproof Design

Equipped with up to 4 field-replaceable sensor modules, enabling easy maintenance and long-term performance.

Modular, Field-Replaceable Sensors

BUILT FOR REAL-WORLD CONDITIONS

AirVisual Outdoor is engineered for reliable performance in real-world environments. Monitoring up to 8 outdoor parameters, air quality conditions and temperature levels can be measured with hyper-local accuracy. With wall and pole surface attachments included, AirVisual Outdoor provides reliable pollutant data anywhere, anytime.

8 Environmental Parameters

Monitors various outdoor pollutants and environmental conditions with microscopic precision, such as smoke (PM1), fine dust (PM2.5), coarse dust (PM10), temperature, relative humidity, and barometric pressure.

Seamless Connectivity and Installation

Includes wall and pole surface attachments for simple installation within any outdoor space, as well as in-app connections for remote monitoring.

HYPER-LOCAL AIR QUALITY MONITORING

AirVisual Outdoor enables real-time, hyper-local air quality monitoring for communities, schools, and organizations—helping you understand pollution levels exactly where you live, work, and operate.

High-Accuracy PM Sensors

Delivers reliable measurements of outdoor pollution, including PM2.5, in real time—providing clear insight into local air quality conditions.

Connected Data Platform

Share and access air quality data globally through the AirVisual platform, contributing to a network of real-time environmental intelligence.

Monitors up to 8 environmental parameters with WiFi connectivity and a protective design built for all outdoor conditions.

Outdoors our monitor detects and reports on harmful particles and gases. The **AirVisual Outdoor** can monitor up to 8 environmental parameters: AQI, PM1, PM2.5, PM10, Temperature, Humidity, Barometric Pressure and optional CO2.

AQI PM1 PM2.5 PM10 Temp. Humidity Barometer C

The IQAir AirVisual Pro and Outdoor are professional-level air quality monitors with a comprehensive set of sensors.

★★★★ Overall rating 4.2 (5) reviews

See why customers around the world love the Airvisual Outdoor

★★★★★ Has everything that I was looking for

The AirVisual Outdoor had ***all of the features that I was looking for.*** Setting it up was very quick and it didn't take them too long to approve my station and make it public.

– **Ray T.**

★★★★★ Simple to set up and informative

It was easy to set up and install. I got the indoor and outdoor monitor together. I would recommend getting both together as you get the full range of information. I live next to the freeway so I was interested to see the readings of pollution and PM 2.5 levels outside of my house compared to indoors...

– **shay104**, Los Angeles, CA

★★★★★ Robust and precise, feature-packed and (sic) seamless integration

Both the iPhone app and the device itself exceeded my expectations in terms of design and functionality. ***The seamless integration*** between hardware and software not only made it easy to monitor the air quality around my home but also allowed me to share this valuable information with the wider community.

– **Christian** Victoria, Canada

Great

Works like it was supposed to. I am glad I can see what is the air quality outside. The only downside is that temperature sensor is not the best one. In case of direct sun it over inflates the temperature. However this is not it's main purpose … Great device overall.

Good Product

Really good quality and totally worth the money. Smooth delivery and solid packaging. It got delivered straight to my place in great condition. Works perfectly and I've already got it online. "

AirVisual Outdoor

Leider habe ich den AirVisual Outdoor gekauft ohne mich vorher ausreichend zu informieren. Geplant war, das Gerät über MQTT in meine Home Assistant Installation zu integrieren um damit laufend die Werte für PM1, PM2,5, PM10, Temparatur und Luftfeuchte zu erhalten. Wie sich jetzt herausstellt ist das... **Read more**
