Health recommendations

Page Summary

What is a health recommendation?

Health recommendations are health advice and recommended actions for current air quality conditions.

The recommendations are tailored for the general population, as well as six at-risk populations and groups with greater sensitivities to pollutants than the general public.

Supported populations

Population	Description
General population	No specific sensitivities.
Elderly	Retirees and people older than the general population.
Lung diseases	Respiratory related problems and asthma suffers.
Heart diseases	Heart and circulatory system diseases.
Athletes	Sports and other strenuous outdoor activities.
Pregnant women	Women at all stages of pregnancy.
Children	Younger populations including: children,toddlers, and babies.

Note: The API offers local data and generic insights broken down by supported populations that are based on guidelines from the World Health Organization (https://iris.who.int/bitstream/handle/10665/345329/9789240034228-eng.pdf).
